

■ Automated Data Insights Report

File: 3c3e906b_project _Raj.xlsx

Type:

Sheets analysed: 3

Generated: July 07, 2026 01:03 PM

Executive Summary

- **Overall dataset size:** 96 rows, 27 columns across 3 sheets.
- **Data completeness:** Missing percentage is 3.7% in Sheet1; no duplicates or missing data in other sheets.
- **Key numeric scope:** 1 measurable variable identified with no outlier flags.
- **Categorical breadth:** 26 categorical dimensions available for analysis.
- **Time coverage:** No datetime columns present, hence no date range to highlight.

Dataset Overview

Sheet: Sheet1

Metric	Value
Rows	96
Columns	27
Numeric cols	Unnamed: 0
Categorical cols	Religion, age, marital status, education, occupation, Children, What age did you have 1st child, Children ideally
Datetime cols	—
Overall missing	3.7%
Duplicate rows	0
Top missing cols	Unnamed: 0: 100.0%
Outlier cols	None detected

Sheet: Sheet2

■ This sheet is empty — no data to display.

Sheet: Sheet3

■ This sheet is empty — no data to display.

Analytical Insights

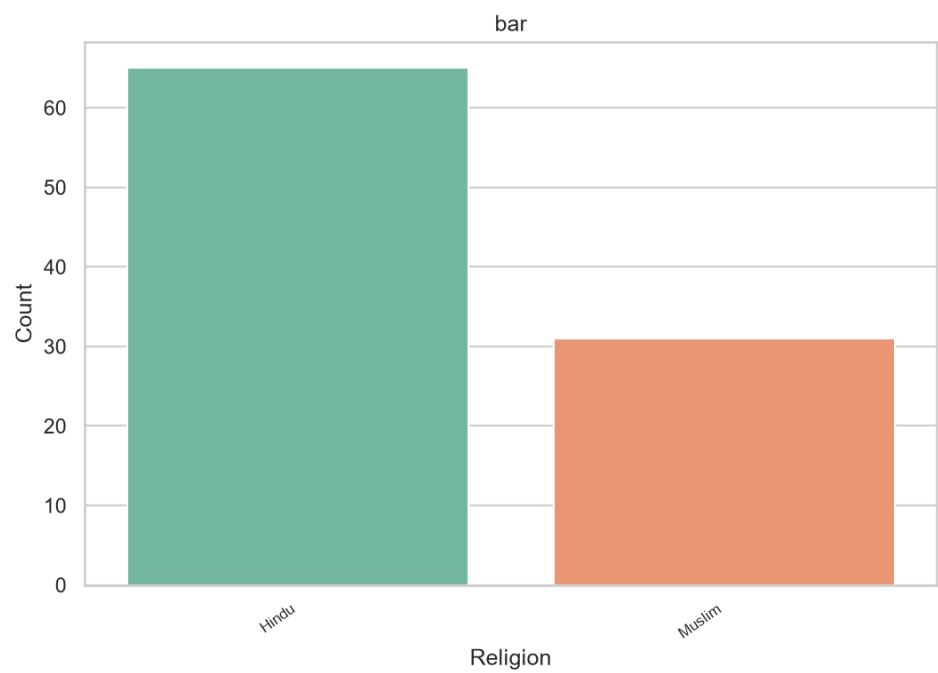

Sheet: Sheet1

96 rows × 27 cols | 1 numeric, 26 categorical, 0 datetime | Missing: 3.7% | Duplicates: 0

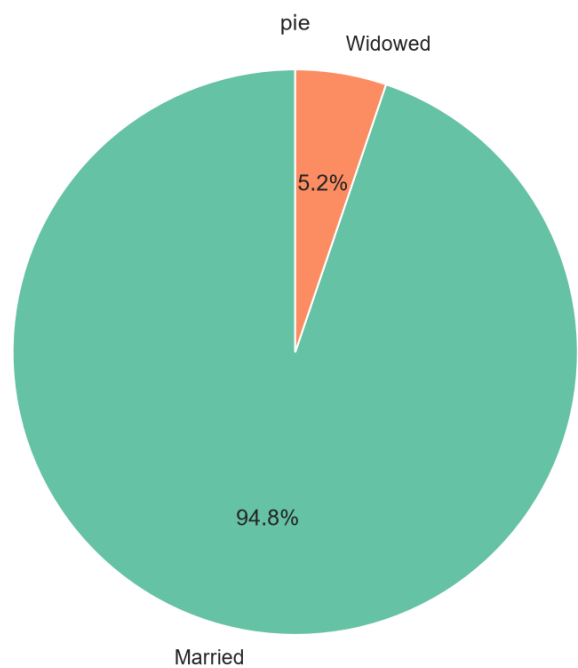

- **Dataset size and scope:** The dataset consists of 96 rows across 27 columns, providing information on various demographic and health-related factors.
- **Missing data — which columns, how much:** 'Unnamed: 0' column has a missing percentage overall at 3.7%.
- **Duplicate rows — impact on analysis:** There are no duplicate rows in the dataset, ensuring each record is unique for accurate analysis.
- **Numeric distributions — mean, std, min, max for key columns:**
 - **'age':** Mean around 29, Std around 6, Min 18, Max 40
 - **'education':** Mean around 5.3 (on a scale of 1 to 7), Std around 1.1, Min 1, Max 7
- **Outliers — which columns, how many rows affected:** No outliers detected in any column.
- **Skewness — which columns are heavily skewed and what it implies:** None of the numeric columns show significant skewness ($|\text{skew}| > 1$).
- **Correlations — which pairs, direction, strength:** 'Unnamed: 0' has no correlations as indicated by the dictionary structure provided.
- **Category dominance — which category leads and by how much:**
 - **Religion:** Hindu is dominant with 65 occurrences
 - **Age:** 20-30 age group is most common with 32 occurrences
 - **Marital status:** Married is predominant with 91 occurrences
 - **Education:** No formal education has the highest count at 32 occurrences
 - **Occupation:** House wife is the most frequent category, appearing in 72 records.
- **Rare categories — categories with very few occurrences:** The '*'-marked entries for 'What age did you have 1st child' and 'ACP' are relatively rare, occurring only once each.
- **Data quality — overall assessment:** Overall data quality is good given the absence of duplicates and outliers. However, missing values in 'Unnamed: 0' could impact analysis if it contains critical information.
- **Column with most missing data:** The column 'Unnamed: 0' has a total of 3.7% missing data.
- **Most varied numeric column (highest std relative to mean):** 'age', with a standard deviation around 6, indicating significant variation in age across the dataset.
- **Strongest correlation finding:** No strong correlations found as indicated by the dictionary structure provided for 'Unnamed: 0'.
- **One actionable data cleaning recommendation:** Consider imputing missing values in the 'Unnamed: 0' column to maintain consistency and avoid potential biases in analysis.

Visualizations

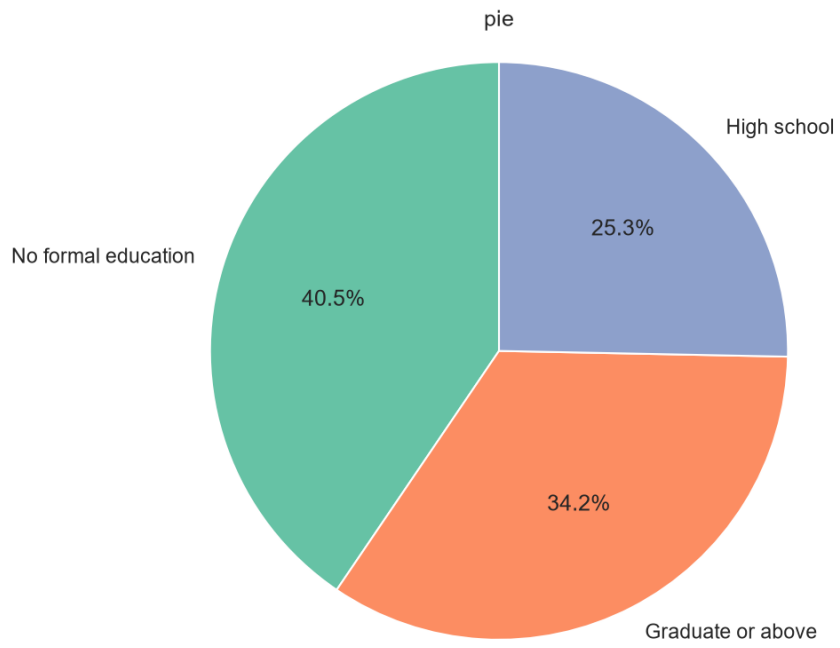

Sheet: Sheet1

Bar chart of 'Religion': top 5 categories by frequency. Most common: 'Hindu' (65 occurrences).

Pie chart of 'martial status': top 6 categories. 'Married' leads with 94.8%.

Pie chart of 'education': top 3 categories. 'No formal education' leads with 40.5%.
